Current position

2024– **Research Fish Biologist**, Rocky Mountain Research Station, USDA Forest Service

Education

Ph.D.	2020	Ecology	University of Wyoming
M.Sc.	2015	Conservation Biology	University of Alberta
B.S.	2011	Conservation Biology <i>cum laude</i>	SUNY: College of Environmental Science and Forestry

Research summary

I am a conservation ecologist studying the population and food web ecology of freshwater fishes. I combine stable isotopes, otolith chemistry, long-term monitoring, remote sensing, and spatial and Bayesian modeling to ask how climate change, wildfire, and altered flow regimes reshape fish populations. Current work centers on salmonids in the interior Columbia River basin, and on building open, reusable tools for the agencies that must act on the results.

Selected awards and honours

2026 Outstanding Service Award, USDA FS Rocky Mountain Research Station
2024 Outstanding Service Award, USDA FS Rocky Mountain Research Station
2019 Dean's Graduate Scholar Award, College of Arts and Sciences University of Wyoming
2017 William Trachtenberg Scholarship, Sustainable Fisheries Foundation

Selected papers

Since 2015 I have authored 26 research papers on fish and conservation topics. Some highlights are listed below, with citations taken from Google Scholar on 7 October 2026. My h-index is 14 with total citations of 739.

- Sparks*, M.M., **Maitland*, B.M.**, Felts, E., Swartz, A., & Frater, P. (2026). hatchR: A toolset to predict when fish hatch and emerge. *Fisheries*, 51(2), 49–59. <https://doi.org/10.1093/fshmag/vuaf078> [Citations: 3].
- Maitland, B.M.**, Bootsma, H.A., Bronte, C.R., Bunnell, D.B., Feiner, Z.S., Fenske, K.H., Fetzer, W.W., Foley, C.J., Gerig, B.S., Happel, A., Höök, T.O., Keppeler, F.W., Kornis, M.S., Lepak, R.F., McNaught, A.S., ... Jensen, O.P. (2024). Testing food web theory in a large lake: The role of body size in habitat coupling in Lake Michigan. *Ecology*, 105(10), e4413. <https://doi.org/10.1002/ecy.4413> [Citations: 15].

(2017). Meeting the challenge of interacting threats in freshwater ecosystems: A call to scientists and managers. *Elementa: Science of the Anthropocene*, 5(72), 1–15. <https://doi.org/10.1525/elementa.256> [Citations: 210].

Selected funding

Led, co-led, or partnered on \$0.3 million in funded projects since 2015, plus invited proposals exceeding \$2 million in scope.

2026–2028	Partner. “FLAMES: From flames to fish: Co-management for wildfire and aquatic species in Idaho”. <i>Joint Fire Science Program</i> .	\$150,284
2025–2027	Lead-PI. “Monitoring Chinook Salmon spawning from space”. <i>Trout Unlimited</i> .	\$38,122
2024–2027	Lead-PI. “Chinook Salmon life history and otolith microchemistry”. <i>UC-Davis and USDA Forest Service</i> .	\$50,184
Pending	Co-PI. “Idaho Bull Trout migration timing and habitat use”. <i>U.S. Fish and Wildlife Service</i> .	\$159,900
